

12-Week Fat Loss Workout Plan

Week Cover - Day : Program Overview & Goals

12-Week Fat Loss & Athletic Conditioning Program

Plan Overview:

This structured gym plan is designed for intermediate trainees who want to drop body fat, improve cardiovascular health, and build an athletic, toned physique. The approach combines strength training, cardio conditioning, and progressive overload to maximize fat loss while building functional strength and muscular definition.

Schedule:

- 3 Workouts Per Week (e.g., Mon/Wed/Fri or Tue/Thu/Sat)
- Each session: 60 minutes including warm-up, training, cardio, and cool-down
- Exercises rotate between barbells, dumbbells, machines, and bodyweight
- Cardio includes treadmill, elliptical, rowing, and interval training
- Progresses across 3 phases:
 - Phase 1 (Weeks 1-4): Foundation & Conditioning
 - Phase 2 (Weeks 5-8): Strength & Intensity
 - Phase 3 (Weeks 9-12): Peak Performance & Fat Loss

Main Goals:

- Reduce body fat while preserving/building lean muscle
- Improve cardiovascular fitness and stamina
- Develop strength using fundamental compound lifts
- Build core stability and balanced total-body conditioning
- Finish leaner, stronger, more athletic

Who It's For:

- Intermediate-level gym users with no major injuries
- People who can consistently commit to 3 workouts per week
- Those seeking variety in training (strength + cardio)
- Anyone wanting a balance of performance, aesthetics, and endurance

How to Use:

- Follow each day's workout (1 page per workout)
- Track weights, cardio times, and progress weekly
- Adjust intensity based on recovery and performance
- Stay consistent - results compound over the 12 weeks

Bonus:

- Tracking sheets and exercise reference guide included

Let's get after it.

Week Reference - Day : Exercise Execution Guide

Exercise Reference Guide

This section provides instructions for executing each key exercise in the 12-week plan. Use it to learn proper form, positioning, and intent.

Barbell Back Squat:

- Bar on upper traps, feet shoulder-width, toes slightly out.
- Brace core, sit back and down until thighs are at least parallel.
- Drive up through heels, keeping chest tall.

Barbell Deadlift:

- Feet hip-width, grip bar outside knees.
- Hinge at hips, flat back, engage lats.
- Pull through heels, extend hips and knees simultaneously.

Barbell Bench Press:

- Lie flat, grip bar just wider than shoulders.
- Feet flat, glutes and shoulders stable.
- Lower bar to sternum, press up to full extension.

Dumbbell Bench Press:

- Same as barbell but allows greater range of motion.
- Lower DBs outside chest, press straight up.

Overhead Press (Barbell or Dumbbell):

- Stand tall, core braced.
- Press weight overhead without leaning back.
- Lower under control to shoulder level.

Bent-Over Row:

- Hinge at hips, flat back, barbell or dumbbells in hand.
- Pull to lower chest, squeeze shoulder blades together.

Seated Cable Row:

- Sit tall, pull handle toward navel.
- Keep elbows close, retract scapula.

Lat Pulldown:

- Grip bar wide, pull to upper chest.
- Keep chest up, don't swing or lean back excessively.

12-Week Fat Loss Workout Plan

Pull-Up / Chin-Up:

- Start from dead hang.
- Pull chin over bar, squeeze lats.
- Use assistance if needed.

Romanian Deadlift:

- DBs or barbell; soft knees, hinge at hips.
- Stretch hamstrings, keep back flat.
- Drive hips forward to return.

Bulgarian Split Squat:

- Rear foot elevated, front leg does all the work.
- Lower until front thigh is parallel, drive up through heel.

Walking Lunge:

- Step forward, drop rear knee to just above floor.
- Push off front foot to step forward again.

Step-Up:

- Place foot on bench, push through heel to stand.
- Control the step down.

Cable Triceps Pushdown:

- Elbows pinned to sides.
- Extend arms to full lockout using triceps.

Biceps Curl (EZ-bar or DB):

- Elbows fixed, curl to shoulders.
- Don't swing or use momentum.

Plank:

- Elbows under shoulders, flat body line.
- Engage glutes and abs, hold position.

Side Plank:

- Elbow under shoulder, feet stacked or split.
- Hold straight line through body.

Russian Twist:

- Sit back slightly, twist torso side to side.
- Can be weighted.

12-Week Fat Loss Workout Plan

Dead Bug:

- On back, alternate opposite arm and leg lowering.
- Keep lower back flat on floor.

Mountain Climbers:

- From push-up position, drive knees to chest rapidly.

Box Jump:

- Jump explosively onto a box, land soft.
- Step down to avoid injury.

Push-Up:

- Body in straight line.
- Lower chest to floor, press back up.

Woodchopper:

- Cable or DB.
- Rotate torso as you bring weight diagonally across body.

Back Extension:

- On roman chair, lower upper body, then lift with glutes and hamstrings.

Ab Wheel Rollout:

- Kneel, roll out while keeping core tight.
- Don't arch lower back; roll only as far as control allows.

Burpee:

- From standing, drop into push-up, jump back up.
- Optional push-up and jump at top.

If unsure, ask a gym trainer to demonstrate. Always prioritize form over weight or reps.
